

# Skykomish Cleanup

## Construction update

November 13, 2008

### Recent activities

- Pumped water from a West River Road catch basin on Wednesday, 11/12. This prevented flooding at West River Road.
- Placed boulders in the Skykomish River to enhance fish habitat.
- Continued delivering equipment and trenched conduit to the HCC system building along Old Cascade Highway.
- Continued work on the joint utility trench (JUT).
- Continued restoration work on the Whistling Post and Craig house.

### What's happening next?

- Crews plan to pave Railroad Avenue with asphalt-treated base (ATB) on Monday and/or Tuesday. Grading and other prep work will take place over the weekend.
- Crews will continue JUT work under Railroad Avenue after it is paved with ATB. This is to make sure the JUT schedule does not interfere with paving Railroad Avenue. The road will be patched upon completion of JUT installation.
- Temporary street lights will be installed within the next two weeks.
- Continue restoration work in town, including restoring the Craig house and Whistling Post.
- During final grading activities, it is difficult to create good pedestrian and traffic lanes. Thank you for your patience and please continue to be safe when walking or driving on Railroad Avenue. Crew members are available to help direct you through town.

### Pilot test tour

**Thursday, November 20**

**Sign up at Town Hall** to reserve your spot on the walking tour of the pilot test. This test, located on the BNSF railyard, is evaluating a cleanup technology that may be used to clean up contamination under the Skykomish School.

Please sign up if you want to attend the tour. Only people who sign up will be able to attend.

**Tour participants should meet at the Community Center at 1:30 p.m. on November 20.** The tour will last approximately one hour. Name badges will be provided.

Please call the Skykomish Call Line if you have any questions: 800-228-1849.
